WATER BASED MARKER 15

New 15mm tip!

We've extended the Water Based marker family with a new 15 mm tip size.

It's the perfect marker for refilling, painting, drawing, decorating, and outlining on surfaces as varied as canvas, plastic, metal, glass, and heavyweight paper...

These new refillable markers can be used in combination with the rest of the Water Based products developed by Montana Colors. They may also be used on fine art acrylic paints and are compatible with the MTN 94 and Hardcore spray paints.

You can use different techniques to achieve a variety of finishes.

Range of 18 colors, of paint with the following features: very good coverage, excellent elasticity, and complete adherence within a 24h. time period (depending on the surface).

15mm WB Marker: SPRO0124 + Color

3mm WB Marker: SPRO0120 + Color

5mm WB Marker: SPRO0119 + Color

15mm tip.
(2 units)
SPPU010501

3mm tip.
(2 units)
SPPU010504

5mm tip.
(2 units)
SPPU010503

Features:

- 18 highly pigmented colors.
- Water based matte paint.
- High opacity and coverage.
- Excellent elasticity.
- Adheres to many surfaces.
- Refillable with the WB 200 ml refills.

15mm tip:

Thanks to its rectangular 15 mm tip, this marker is now the largest one in the family and it's designed for large format work. High quality, replaceable tips available in packs of 2 units. All tips may be rinsed with water. With this valve system you'll be able to control the quantity of paint flow with great precision by simply pressing the tip down onto the surface in order to pump the paint into the tip.

Instructions for use:

1. Before using, shake the marker vigorously (with the lid on) so the paint mixing balls mix the paint.
2. Press the tip down on the surface several times until it is moist with paint.
3. After use, remember to store with the lid on.
